

# Week 4 Push Status Report

**Date:** January 31, 2026  
**Repository:** <https://github.com/emstar-en/STUNIR>  
**Branch:** devsite  
**Status:**  SUCCESS

## Push Summary

### Commits Pushed

- Successfully pushed **3 commits** to `origin/devsite` :
- 1. **19d1397** - docs: Add commit hash to Week 4 completion report
  - 2. **e3614e5** - Week 4: Fix Critical Blockers for v1.0 Release
  - 3. **db6457d** - Add comprehensive gap analysis report for v1.0 release readiness

### Push Details

- **Source Branch:** local `devsite`
- **Target Branch:** `origin/devsite`
- **Push Range:** `a1ebb76..19d1397`
- **Commits Count:** 3
- **Push Method:** HTTPS with GitHub token authentication

## Verification Results

### Remote Status Check

-  Local branch is up to date with origin/devsite
-  All Week 4 commits are present on remote
-  Commit hashes match between local and remote

### Remote Commit Log (Top 5)

19d1397 docs: Add commit hash **to** Week 4 completion report  
e3614e5 Week 4: Fix Critical Blockers **for** v1.0 Release  
db6457d Add comprehensive gap analysis report **for** v1.0 release **readiness**  
a1ebb76 Add Week 3 Completion Report  
2f9a968 Add Week 3 comprehensive documentation

## Week 4 Deliverables Pushed

---

### Critical Blocker Fixes (e3614e5)

-  Fixed Python f-string syntax error in `targets/embedded/emitter.py`
-  Added reference implementation warnings to Python tools
-  Updated SPARK emitter infrastructure
-  Created investigation report for emitter status

### Documentation Updates (19d1397)

-  Updated Week 4 completion report with final commit hash
-  Documented all blockers resolved

### Gap Analysis (db6457d)

-  Comprehensive v1.0 release readiness report
-  Migration status tracking
-  Emitter coverage analysis

---

## Repository State

---

### Current Branch Status

- **Local Branch:** `devsite`
- **Remote Tracking:** `origin/devsite`
- **Sync Status:** Up to date
- **Uncommitted Changes:** 1 file ( `.abacus.donotdelete` - system file, not tracked)

### Repository Health

-  No merge conflicts
-  All Week 4 commits successfully pushed
-  Remote history matches local history
-  Repository ready for further development

---

## Next Steps

---

1.  Week 4 commits are now available on GitHub
  2.  Team members can pull latest changes from `origin/devsite`
  3.  Week 5 development can begin on clean base
  4.  Consider merging `devsite` to `main` for v1.0 release preparation
-

## Technical Details

---

### Git Push Output

```
To https://github.com/emstar-en/STUNIR.git
a1ebb76..19d1397  devsite -> devsite
```

### Authentication

- Method: HTTPS with Personal Access Token
- Token: ghp\_...9ZR (masked for security)
- Status:  Authentication successful

---

## Conclusion

**All Week 4 commits have been successfully pushed to GitHub.**

The `devsite` branch on `origin` now contains:

- All critical blocker fixes
- Complete Week 4 documentation
- Gap analysis for v1.0 release readiness

The repository is in a clean state and ready for Week 5 development or v1.0 release preparation.
